DETAILED ACTION

Claims 1-3, 5-19, 22-31 are included in the prosecution of this application. The election of tablet is acknowledged and upon reconsideration, restriction of instant claims is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to a pharmaceutical composition, classified in class 424, subclass 472.
- II. Claims 30-31, drawn to method of administering, classified in class 424, subclass 474.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are structurally different. Invention I has different release rates and does not require a signaling system. Invention II has a different structure with a signaling system. Further, invention I may be administered orally without a specific sequence whereas invention II has specific sequences that are unique and distinct.

This application contains claims directed to the following patentably distinct species of the claimed invention: tablet or capsule due to their distinct structures.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, pharmaceutical composition is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Attorney Myers in March 2002 a provisional election was made with traverse to prosecute tablets, claims 1-3, 5-19, and 22-31. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 1616

Claims 4 and 20-21 are withdrawn from further consideration by the examiner, 37

CFR 1.142(b), as being drawn to a non-elected invention.

Conclusion
